Experience

CommandLink
12/2023 - Present

Full-Stack Software Developer — Austin, TX (Remote)

CommandSecurity | *Ansible, FastAPI, Laravel, React, MySQL, OpenSearch, Celery, Jenkins*

- Migrated legacy PHP Yii services to Python FastAPI microservices for CommandSecurity
- Replaced an unscalable EAV model with normalized MySQL schemas for a more performant backend
- Moved sync from request-time triggers to Celery event jobs, reducing API load and sync failures
- Integrated third-party APIs to aggregate partner feeds from Microsoft Defender, SentinelOne, etc. into security product
- Built Jenkins CI/CD pipelines for Docker builds, ACR publishing, and Azure Container Apps deployments
- Supported first-year CommandSecurity growth to $305K annual revenue, 11 customers, and 435 managed assets

KnowledgeBase | *Terraform, FastAPI, Swagger, CosmosDB, Blob Storage, Cognitive Search, Docker*

- Terraformed backend architecture across Azure services
- Built FastAPI services for KnowledgeBase content APIs and platform integrations
- Implemented Azure Cognitive Search with vector + keyword context retrieval for article discovery

International Public Safety Data Institute
07/2023 - Present

Software Developer (Volunteer, Non-Profit; Outside Full-Time Role) — Austin, TX (Remote)

NPM, TypeScript, AWS (Lambda, S3, CloudWatch), RabbitMQ, Elasticsearch, Grafana, Sentry

- Supports fire-service analytics modernization for accreditation and operational planning
- Migrated RMS/CAD lambdas and normalizers for NERIS changeover from NFIRS
- Integrated Geographic, Weather, Census, and Parcel APIs plus SHP files for regional enrichment
- Standardized and enriched incident data in ETL workflows
- Improved logging and Sentry visibility, accelerating customer-facing data debugging

Samsung Austin Semiconductor, LLC.
06/2018 - 12/2023

Engineer II — Austin, TX (Hybrid)

Big Data, Python, FastAPI, Streamlit, VBA, Bash Script

- Co-established the Data Solutions subteam and built chat commands for streamlined tech information access
- Built Big Data process-parameter dashboards to improve workflow monitoring and engineering decision speed
- Built FastAPI, VBA, and batch-script automations saving approx. 3 engineer-hours/day
- Mentored and onboarded new engineers on system workflows and critical-thinking methods for defect analysis
- Saved $400K/year by optimizing residual gas analysis (RGA) process cleans and reducing material waste

Personal Projects

ClearView Vision
04/2023 - 08/2023

React, JSX, TailwindCSS, Figma, GitHub Pages, DNS Reroute, SSL, GoDaddy

- Designed and built a production website for a local optometrist using React and TailwindCSS
- Translated wireframes to polished UI components through iterative design in Figma
- Configured domain, DNS, SSL, and GitHub Pages hosting for *clearviewatx.com*

Education

Master of Science in Computer Science
01/2022 - 12/2024

Georgia Institute of Technology — GPA: 3.80 / 4.00

Machine Learning Specialization

Bachelor of Science in Mechanical Engineering
08/2015 - 05/2018

The University of Texas at Austin — GPA: 3.83 / 4.00

Business Foundations Certificate Program
